Just open always.dat and extract all the appropriate hud files in to your data folder.

That's a stupid thing to do. If you want to use the default skins just DELETE the custom one from the data folder.

You find a lot of menu PT skins inside some of the infantry/vehicle parks here, just download the file, right click and extract and take the hud files from them, then place in the data folder.

Just a warning, if you double click the file to run, you will get new tank/infantry skins as well.
