Subject: getting error 2
Posted by WGChavik on Sat, 02 Aug 2008 13:25:58 GMT

was patching cp2 again only now i geted an eror while patching it says:
if you experience problems whit renegade (e.g. renegade wont start,
always.dbs missing, wrong language), make a note of what this program says and report it to
blackhandstudios .
language ID = 0
English detected
removing old always.dbf
error 2
and im getting black screen the whole time when i start renegade

Black screen is because you tried installing core patch 2 after installing scripts 3 usually.

It will save you and us a lot of hustle if you just reinstall following this guide.

You'll have to manually install the cp's, as explained in there as the renguard update doesn't really
work well anymore.

ok thx for the help
but when im running cp1 it says old file does not exist and it stops by 39% proccesing:
Mssfast.m3d

Are you sure you installed patch 1.037 first? If you have Vista, are you running everything in
admin mode?

Why do you install CP1 if you can install CP2 who has CP1 included?

i got C&C teh first decade i dident have to instal the patch 1.037 and ive got windows xp
and hwne i start installing cp2 it says:
old file nto found. however, a file of teh same name was found. no update done since file contents
do not match
and im running patcher whit the CP2.RTP
its not getting better and im gettin more angry and crazy because im already busy whit it maybe 1
week
