So I downloaded the 1.037 renegade FDS server, got everything right, I used the so called 0669 serial fix at the installation, then went to the server.ini and changed it to my serial I got when I bought the game.

I also created a nick, working perfectly on Renegade WOL.

Oh, the server is WOL too.

But it says: "Failed to create game channel."

And after that just keeps retrying.

I need that fixed, but the serial and nick/pass is all correct.

I have searched too, finding no answers.

Anyone that can help me?

No, I did not.

lol. x)

EDIT: I fixed it, might've been my pass after all.

I reset the password and then changed, now it's working fine.

Stupid me, lol.
