Is it possible that the scripts 3.4.4 sometimes randomly decides to change your weapon?
I've had it numerous times now that my weapon switched to c4 or pistol on random occasions by itself.
It only happens with 3.4.4 scripts.dll

I do.

I also use RR.

I had this too once. It ended up bein my mouse; The scrollwheel was stuck between 2 clicks. After driving it over the table for some massive scrolls, it was fixed again.

Dunno if it's related tho.

my mouse does that too, and it really pisses me off at times
like when i'm trying to disarm a beacon and at the last moment it switches to the pistol or
something and we lose the game because of it

that's honestly happened multiple times

sometimes when i hit the mouse on the tabble (when i lift it and put it back to turn faster) it
happens sometimes when i put it back

It must be something in the dll because you cant select empty
hands using the mouse buttons. It keeps doing this from time to time.
And no i didnt throw my c4..

Bots do it if u wait a bit and they don't do anything they just hide their wep and start doing animations.
Try the bot maps u have on game-maps

I think it's indeed your mouse. I had it too untill i set my mouse scroller to 1 row each 'scrollclick'.
Now it's gone

he means it changes from a random weapon to empty hands (not between weapons) right?

I think it is my mouse indeed, its also happening in other games now.

Annoying but not a bug with scripts 3.4 then
