I have a stupid problem

i have renegade CD and installed, installed leveledit which is renegadetoolsinstaller2 and installed gmax

renegade at c:\westwood\renegade

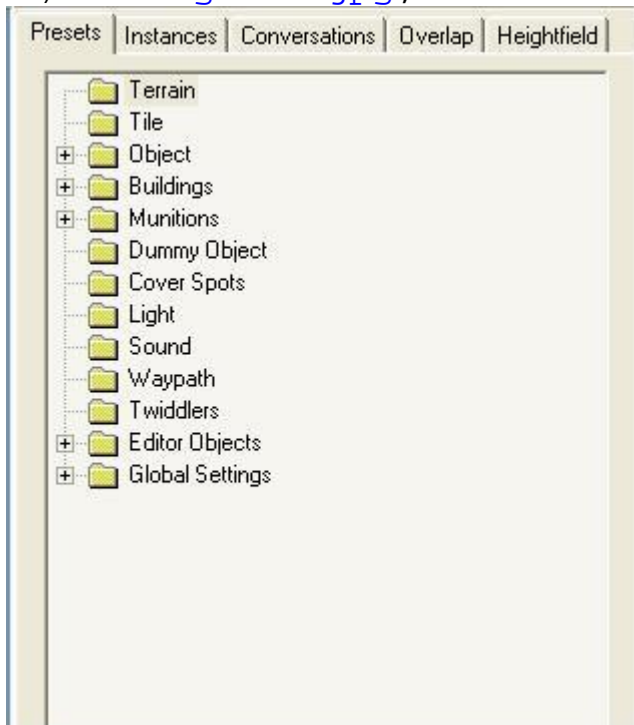

no i dont have first decade

my leveledit do not have options at the presets which is like this picture attached

any help?

Hmm, dunno what causes that, but you could try getting XCC mixer, then extracting objects.ddb, temps20.ddb, and the other ddb file (conv or something) into the presets folder for your mod. Should fix it.

sorry if this is the wrong section

no mods its renegade itself

Ok now check the registry HKEY_LOCAL_MACHINE > Software > Westwood > Renegade > intallpath (add ur install path in it and include the .exe)
and make sure the folder in regedit is "Renegade"
Every new modder had this problem
