Hey,  
I read millions of articles about getting FDS setup.  
I can't create a game channel correctly.

This are the steps I did:

1. I already had Renegade installed (not RenGuard)
2. I downloaded RenegadeFDS\_1037.exe
3. I installed it with my username/password and the standard 0669 serial.
4. I edited the server.ini and changed it to my serial (it's an official copy of Renegade)
5. I cannot create a game channel (firewall and router are not blocking)

Can any1 help me with this problem??? Maybe a client serial doesn't work??? Can any1 tell me please

Thanks!

I solved it, my serial didnt work. Then I tried it with a friends serial and it worked!

Sorry for trouble
