hi guys
first of iam german is not so good.
lets go i wanted to make chathistory and I went ingame on "bhs.dll options" and enabled "enable ingame log" or something like this.
i put the key for chathistory in keycfg.exe on F1 like
chathistory=F1_Key

then I startet ren, chathistory doesnt work, I tried different things with keycfg.exe and then I couldnt start renegade.

"unfortunately, there was an error loading´bhs.dll.Please report this bug!"

I just wanted to have chathistory and now I´ve to run renegade with scripts 2.9.2.!

dont know if it helps but i´ve uploaded crashdump too

so far

```
File Attachments
1) crashdump.txt, downloaded 192 times
```

You don't need to bind chathistory to a key really, if you want it on, just enable it in the options, and then restart Renegade.

You can probably fix your loading error by Reinstalling Scripts 3.4.4.

just downloaded and reinstalled it - doesnt work.
i can´t reinstall renegade because I deinstalled it in the wrong order last time so when I install the game there is no optical font.

Restarting your computer normally fixing the bug where the text won't appear.

Be sure to reinstall Renegade in the order described here.
