Hey all,

I'm coding my build server in c++ and i'm learning stuff

but i was wondering how to make a !save and !load command???

i'm really a n00b

Greetz.

What exactly do you want to save and load?

Well

Everyhing you created

like in DWC and AT4LANTIS

like in DWC and AT4LANTIS
Well gike, you need to code it yourself ^^

W4rning wont give it to you, same like Darknes2 (i already checked both of them). Darknes2 would give you maybe some hints.

MackKinsey

EDIT:

Quote:What exactly do you want to save and load?

He wants to create such a command for everything he build, like blockers, laser fences.....

And Gike, your Dream is beeing a big Server, then u should always have opened ports, a strong computer (no labtop), really fast Internet, long Uptimes (best would be 24/7)

WEll mackinsey

i got news

I found somebody with a strong Serverbox

(servers load in 1 sec) ports are always open and hosts 24/7

and he hosts for me free

because i fixed his server.

Greetz.
