I see no models. All I see is a banner with Havoc, Sakura, a Humm-vee and a Flame tank.

And they are all default Renegade models. :\

LEAVE MY FRIEND ANANT ALONE

OK, guys what anant was talking about are the beta models of Renegade that recreated the vehicles from the original Command & Conquer game (TD).

(lol here's my rule about games you care about: you gotta have accounts in all important communities thats a rule damnit!)

anant is looking for these models. Strangest coincidence is that all day at work today, I was looking forward to the evening so I can post my request for these as well. Past one week I have gone hyper over anything C&C.

TD Harvy

Buggy:

Flame Tank (wow!)

GDI Humvee (TD)

Dunno what these are? Maybe MCT's...

NOW, I remember last year that Canadacdn (I think) I think made a thread where he told everyone to share their beta stuff. And I think, I saw some of these there. There are also many other models like the original Nod light tank:

Light tank:

Recon

Meanwhile, time for me to search this forum!

OMG Edit: Found this thread but all the download links are broken

EDIT: Here is Canadacdn's thread

Dont want to dissapoint you but some files are NOT from westwood.

The sniper rifle for instance is made by jamiejrg ->

<http://ren.game-maps.net/index.php?action=file&id=1114>

(This one has been fanmade westwood never released this rifle, as far as I know they have never released any gunmodel)

As for the silver laser rifle that you have posted, Im not sure about it if that is the westwood silver laserrifle. In most movies the model is quite different than the laserrifle now.

Plus I might submit tons of beta files for you later, Ironwarrior.

I can only credit the files from where third hand partys, so if they call it that, then I call it that and so on.

Ah, now I get it

Here is the topic where in the sniper was released ->

http://www.renegadeforums.com/index.php?t=msg&goto=252476&rid=22503&srch=beta+sniper#msg_252476

It is just very easy to say something was beta or was made by westwood. It should be carefully checked if it is beta whatever or not

(the sniper rifle is clearly a beta sniperrifle version but it is not westwoods, it is a remake same goes for the pistol that is around it is a remake)
