The Craziest Thing Would Be Too Hack The Westwood F.T.P. Server And Change The Renegade Patch To Make It Recieve From An Other Server To Actually Make The Updates Work, By That I Mean Fans Making Their Own Updates. It Is An Idea That Can Work I Think.

If you care to risk being caught doing it by EA (since you'd have to pretty well tamper with their

DNS server), I say go for it. I personally wouldn't do it though, because if you're stupid enough to get caught, EA will make sure you never recover from it.

Would anyone know of away to get a hold of them?

I'm sorry, it's in French but put your text in the right window on that webpage before you post it here, then copy what's in the left window to make your post.

It won't be perfect but it's a start!
