I Am Trying To Find A Program That Backs Up Your Entire Hardrive For Example, All Your Settings Will Be Saved To C.D.s And All You Would Have To Do Is Load A New Hardrive And Put In Those C.D.s It Would Auto Matically Install The Operating System On The New Hardrive And Then Put All Of My Files And Settings On It Saving Me A Lot Of Time And Effort To Install A New Hardrive And Put All Of My Settings On It And Much Less Effort Would Have To Be Used.

Nortons Ghost

<http://www.symantec.com/norton/ghost>

Quote:

Features

- * Full system backup (disk image)—Backs up everything on a hard drive or partition.
- * File and folder backup—Backs up only the specific files and folders you choose rather than saving an entire drive.
- * FTP backup—Copies recovery points to a FTP site for easier offsite backup management.

NEW

- * Offsite backup—backs up your files to NAS (Network-Attached Storage) devices. NEW
 - * Symantec ThreatCon integration— triggers incremental backups whenever ThreatCon reaches a specified threat level. Great for computers without virus protection. NEW
 - * Incremental and differential backup—Backs up only files that have changed.
 - * EXCLUSIVE! Google Desktop™ integration—Makes data recovery even faster with searchable backup indexes.
 - * LightsOut Restore—Restores your system with an on-disk software recovery environment—no bootable CD required.
 - * EXCLUSIVE!: Remote management—Controls other Norton Ghost installations (12.0 or higher) on your local area network.
 - * Advanced compression and encryption—Minimizes storage space and helps keep sensitive documents safe.
-

No, they're lying. It's really a CD full of nude pictures of Tony Danza.

It Probably Doesen't Do What I Want It To Do I Want It To Back The Operating System To Hence I Just Pop In A New Harddrive And The Operating System Is Installed Allong With All Of My Files And Settings It Saves Me A Lot Of Time And Effort.

Go search for a topic I made about two months ago regarding this same thing. I used Norton Ghost and it worked perfectly. It does exactly what you want, backs it up to an "image" which you can then load onto a new hard drive that is identical to your old one as far as what is on it. Everything including the OS.
