I am having a problem running Renegade, I am running Vista. I installed it, and installed the 1.037 patch. Now when I run it, it shows the "Renegade" screen, but then I get a Vista message that says "Renegade has stopped working". I have also tried running game2.exe, with no luck. How can I solve this problem?

Thanks in advance,  
gr8

Edit: I saw a topic just before mine created with the exact same problem. Delete away.
