Decided after 5 years to re-install Renegade. I have just spent 3hrs trying to install Gamespy (not that I particularly want it).

Installing Gamespy failed because of AVG & comver.dll. Ive tried everything people are talking about on the gamespy forums but I just want to play!

To my question, What servers are you playing on?

Welcome suggestions of none gamespy servers

Read the support FAQs that show you that GameSpy isn't needed?

Then pick any server you like...

WGC C&C (build server)

Classic renegade was getting a little boring. I either play at WGC or I go on Jelly's marathon.

I usually play on Jelly-Server marathon, or on the RP2 server (when it's up).
