Could anyone make me a skin / mod to turn my repair beam black...

or is it not possible?

No, not if you want to use it online im affraid. Because i know the .dds file for it and when you make it black it will be invincible, and when you make it white it will just stay blue.

Only if you would edit in leveledit it would be possible i think

I'm pretty sure that the beam is made with the laser settings... much like the ramjet rifle and the laser chaingun. You can edit their settings in level editor, but I don't know how you would export it into the game without you getting banned for cheating.

It's a level edit only thing. You can't really make a skin out of it.

NuneGa has been banned for: REPAIR BEAM COLOR HACK

do it just so you can say it happened

sighs looks like its time for me to repost my old discussion topics again... give me a sec to find them.

Jerad Gray wrote on Mon, 08 January 2007 00:12But I guess some one could still argue that I was just messing with the colors so just to be on the safe side.

Old topic:

http://www.renegadeforums.com/index.php?t=msg&goto=237871&rid=21300&srch=beam+color#msg_237871

NOTE: Black cannot be done, as the beam is additive, therefore black is invisible.

If not black, red or green would be nice I reckon... perhaps pink too!

Nope I deleted it a long time ago, its just a screen shot of the ms pain color pallet, really easy to make for yourself.
