1. Wrong Section
2. You cannot see GSA server if you are connecting from the same ip as the server.

Also in server.ini set GameType to Gamespy.

You can still join the server if you use for example renip
Enter 127.0.0.1 as the ip and the port the server is running on and click connect.
Or enter the LAN IP of the pc the server is hosted on. This way you
dont need to use gamespy to join it.

1. Why do you post that in this topic, it has nothing to do with this topic.
2. POST ON THE SERVER'S FORUM, NOT HERE!
