when i put the scripts 3.4.4 in i get a error when i start ren
it says i have to update my directx version to run scripts.dll
i have dx9c

i install rene like i noramly do it works fine till i put these scripns in
even if i make a backup copy of ren befor i put scripts in.

so after i put them in i get that error.

then i put my backup copy of ren back in cause the scripts didnt work,

now after i replace backup copy i start rene and the game starts i can hear rene play but my
screen is black, can see anything

has any1 else had this problem?

here a copy of my dxdiag if that helps

tyvm

Looking through your dxdiag, I noticed that your graphic drivers are out-dated.

You can download the current version here for your card:

http://www.nvidia.co.uk/object/winxp_2k_93.71_uk.html

Make sure to remove the old drivers first.

Start.

Control Panel

System

Hardware

Device Manager

Display adapters

Double click card > Uninstall.

Reboot Computer.

Install new driver.

Reboot Computer.

Back to the other problem, just re-install DX.
