<http://www.xfire.com/miniprofile/>

This gives you all the image links for creating an Xfire signature image. Since this forum only allows one image in your signature, regardless of the actual size of the image, you will have to choose between your current signature and the Xfire one.

[xfireplus.com](http://www.xfireplus.com) give's you the chose to have a custom sig and still have the xfire profile on it that is what i'm trying to do.

But i don't know where to upload my sig there....
