Hey boys/girls and all other creatures

i was wondering if there are still any good creators for serverside maps out there?

the question at hand is that im looking for some people or just one who is able to create some serverside maps for our TDM and C&C server.

if you need some kind of inspiration or whatever or wanna see how are current maps look like, then i would suggest you to play at our servers so you can get the big picture.

[WGC] www.wittebolx.com :C&C

[WGC] www.wittebolx.com :TDM

basically its about 2 "new" maps for C&C and TDM.

but im hoping the creator could stick with us for future things related to those 2 servers.

about my maps, i cant even test them to send you because my renegade always crash after second run etc. check this:
(server also)

Click
