Ok. now this bugs the shit out of me. I keep on getting a fatal string error when I load yuri's. now I have run yuri's in 98. and I allowed all access in security tabs. I updated at least 3 times, reinstalled yuri's 4. and still the same problem!

<http://i224.photobucket.com/albums/dd37/xmobster5/problemwithyuris.jpg>

can anybody help me?

Make sure it is set to run as administrator.

cnc95fan wrote on Wed, 22 October 2008 11:33 Make sure it is set to run as administrator. I've tried that to and yes its set. but thing is I had the same problem with Ra2. I did the same thing but the same problem occurd. so what I did was I searched on google for a Ra2 game launcher program, from black assassins and it worked very well. but I really want to play yuri's a lot more ra2 gets boring sometimes for me. anyways. if there is a yuri's launcher that'd be great and might even work for me. but other than that idk.
