Sorry if this is really easy to find, I had no idea how to search for this.

I want to know where to get a program that... well, does something like this:

You: FRush
Game: Gather for a flame tank rush!

or

You: ebar
Game: There's an enemy in the barracks!

Anyone know of a program that does that kind of thing?

*facepalm* that's hard to explain...

I know exactly what you are looking for(I am pretty sure at least), is this what you want(look at attachment)?

You type something, say "repagt" and press enter and what is outputted is: "Repair the AGT!" or something like that.

## File Attachments
1) renautocomplete_v1.09.zip, downloaded 176 times

wait, is that program server-sided or can it be client based, like if I wanted I could download that and say 'apcbarr' and It'd turn out "Apc Incoming at Barracks" in any server?

sorry for the potentially stupid question.

Yes that is the point of this program, it only works with the client(afaik), it's for the slow typing and lazy people
