---

install the original renegade modtools (1) and then just save the weapons tutorial under Renegadepublictools\Howto\weapons )or something like that) to some other name somewhere else and uninstall modtools 1

It's a real pain in the ass to load up msn, go to 1asphost.com, type in my name and password, click on upload, select file to upload, upload, click on newly uploaded file, copy location, load netscape back up, go back to the board, go back here, paste link.

[http://wl8www882.webland.ch/laeubi/tutorials/hand\\_pos/index.htm](http://wl8www882.webland.ch/laeubi/tutorials/hand_pos/index.htm)

That is the correct hand positions and reload animations

And for the way to just put it in game was on the old forums so no getting that back.

That tutorial was on the old forums. I have no clue if anyone saved it anywhere, but if you contact me on aim ill send you a template. all you have to di is resize and rotate. no nneed to attach bones or anything. Just alot of moving it around to get it right.

btw my aim is dw2mc.
