Is there any way to copy the registry key from my renegade folder to my mod's folder in the registry? I've tried manually copying it, but it returns an invalid serial message upon logging onto XWIS.

Yes. I do it every time I install APB/Reborn/other mod.

Make sure you're creating it as a String Value with the name 'Serial'.

Am sure she had a good reason but hell, I don't know her and could care less but this is not the topic for it.

XWIS.
Yes. I do it every time I install APB/Reborn/other mod.

Make sure you're creating it as a String Value with the name 'Serial'.
Yeah I did try that, but I am still getting the invalid serial error. Unless there are other registry strings I have to copy?

Be happy she's nice enough to let you come to these forums to insult her...

Yeah I did try that, but I am still getting the invalid serial error. Unless there are other registry strings I have to copy?
Did you copy just the one entry or have you copied over all of the keys and strings from Renegade? I don't know whether you need all of them, but I'd have them just in case. Also, if your serial is invalid for Renegade, it's going to be invalid for everything that you copy that serial for.

I first tried copying the invididual string, then I copied the entire folder, editing it's path in Notebook. Still no luck
