N00bstories has expanded to have a COD World At War Server. This will have a bot and moderators for regulars.

As it is a new game we are encouraging the renegaders who are purchasing it to come over to the server and fill it up.

The IRC channel is #CoDWaW on irc.n00bstories.com. And the server details are below:

Maps: All default ones.

Map time limits: 10 minutes (Will be revised to 30 soon as possible)

Game modes: Team Deathmatch only. Possibly going to throw up a poll in the n00bstories.com/forums asking for peoples input on which other modes to add.

This server is "Hardcore" only. This means there's no HUD and weapons do increased damage, basically as close to real warfare as possible.

The IRC bot is unique to our server right now, it's a revised version of CoD4CBot which Cunin wrote, currently being re-written to allow CoD5 compatibility.

It's a good game, and the server is flawless. I'm in the UK, it's in USA and while my ping is +200, I barely notice it. (not like ren!)

I don't want to hijack or anything but I'm trying to get something started on the official WaW forums.

http://www.callofduty.com/board/viewtopic.php?f=29&t=61693

It to get Treyarch to put the stats online like they did for all the consoles.

bitters?
Don't worry - you're not welcome there either.

and if you wanna play Cod5 on an European server then please join our server
Server is being moderated by old Renegade players who wanted to continue into the more "high
end" games.

if you like the game and want a position as an admin then please PM me about it.
