Hello community,

after a long hard time our LFDS Server with RR und SSGM is working but I can't use the brenbot plugins, there are only for Windows ?

I try the "Ranks" plugin in version 2.041 and 2.03 but when I start BrenBot he told me

Undefined subroutine &plugin::getGameStatus called at  
/tmp/par-root/cache-b72ad174bac3146232f203937eb26f3cd5d843f6/inc/lib/plugins/rank.pm line  
70.

Did someone know a solution for that problem ?
