Hi I'm trying to get our site banner to be in the middle of the page at the top i have tried a lot of different php coding ways to align center but none of them are working.

I have been googlen it for 4 hour's now every one i have tried never aligned it.

Here is the code we are using for the banner
echo "   <img src=\"themes/RD-TheDark/images/hd/logo.jpg\" width=\"628\"height=\"109\" alt=\"\"></td>\n";

So if anyone can help us out that would be great.

Please and Thank you..

http://www.w3schools.com/Css/pr_pos_vertical-align.asp

Has nothing to do with the PHP at all, just a simple CSS property.

That type of error in PHP means that you have left the simple echo statement and PHP is trying to interpret your HTML code as PHP. Never a good thing.

Add a slash before the character causing the problem or better yet rework the code.

Call me old fashioned, but
echo "<center><img src=\"themes/RD-TheDark/images/hd/logo.jpg\" width=\"628\"height=\"109\" alt=\"\"></center></td>\n";

style="margin: auto;"

Or, to align horizontally only

style="margin: 0 auto;"

headdesks repeatedly

When will people learn that there are forums and tutorials for HTML, PHP, and CSS on the web? I mean, they are so numerous, I can't imagine it being that hard to find a solution to CENTER an image.

If you want the image to be centered, listen to danpaul... except you need to, also, add a clear attribute, so like this:

style="clear:both;margin:auto;"

Then, of course, you're going to need to make it PHP-compatible.
