Yarg!!!! That was my idea!!!! But I am pretty happy that it was actually implemented and not ignored. The next best thing to do would probably be to remove the lag when you run a person over seriously I would have a better K.D. if it wasn't for that.

I suspect that if that is going to be fixed, a lot of bunny hopping is going to be going on.

Meanwhile, Hitman's Renegade 2.0 will be released very shortly! Containing a far improved engine, better artwork and flawless anti-cheat - this update will solve every problem ever experienced by any player of Renegade ever!

Seriously Hitman - help or be quiet, it's tricky understanding 3D code when it's written in some high level language approximating English, let alone freaking binary...

Why not change the whole thing all together, in terms of the font size of the message of the day, maybe even add an "Click Here.". to go to the official forums it can work.
