I've been using Tron Skins for my GDI tanks and would love it if someone could make something similar for me with the nod tanks. All my GDI tanks except for my apc have this skin. I need nod tron tanks

Looks to me like somebody darkened then a whole lot and added those neon lines... I could try it but they would come out really crappy I bet still I might try for fun if I feel up to it, but like I said I doubt they'd be worth using (considering I haven't started skinning until recently).

I could edit mine to be red

I'll try to make some time to edit some of the other ones. The ones you have are pretty good, more detailed, but the colors are kind of dull, bright neon green looks better in my opinion.

i agree the neon green is much more sharp. Then do the red for nod in the same style I think would be sweet. I love the blue nod logo. Thank you all for your help

Gdi needs all but APC I think.

Awesome work, blue Nod vehicles are now my Nod vechs. Problem though, the front grill thing of the stealth tank is still red.

I know why, I'll make a fix asap.

I can do yellow. Buildings and characters... hmm, not yet, but once I build some skill, maybe...

Thanks for replies.

Here's two things.

ONE - Stealth Tank Fix. It has NO neon lines on it (it's a very small piece) so it'll work with both red and blue sets.

TWO - GDI Yellow Skin Set as requested.

Who spilled sugar on your tank?

It's nice quality, but it looks kind of weird to me

I'd like to try and find out if this set is good enough for Game-Maps, but I suck at group screenshots...

I think I'll just hold on to it for now

well i love it and have shown many friends who have downloaded it. hope it does get on there.

What good is it to create something, show it off, then not share it.

thank you for making them and sharing the files.

I might submit to Game-Maps but I don't think it's a good idea without screenies. I'll try to get them soon but it's not a big priority right now. Thanks though.

actually not. was just a comment in general. Scrin has shared with me everything I've asked him for.

it's an old turret model, like you said (i would find your quote, but it was SOOO long ago, it would take a while) so would you release it?

EDIT: here is quote:

Niko wrote on Sun, 23 November 2008 08:06IronWarrior wrote on Sun, 23 November 2008 06:46Caveman wrote on Sun, 23 November 2008 06:35He has GLOWING mines and yet protests that he doesn't cheat. LOL.

DID YOU NOTICE THE FLYING NOD TURRET SO HE CAN SEE PEOPLE HIDING BEHIDE IT???

The mines I like, they are pretty cool to be honest, I wouldn't include them in the cheat category but as in the unfair skins category, I would use them.

Scrin is a cheating little shit, but if he decided to go clean and release his skins, then am pretty sure a lot of people would download them, the skins I have seen in his screenshots are top notch work, hes got some real skills in that area, it seems that our Reborn is converting him to the jedi way.

hmm forgive me, but you know the date of that screenshot? i made it in october 2007... and about that flying turret... my mate made it, but he got mismatch with projectile-model position (its old APB turret)
so now all this is legit
