I try to Start up Ren from my desktop but it says there is No Solution available it will notify me when there is. What does that mean and can someone help me fix that problem?

Thanks.

You mean you get an error, then you send a report and it says there's no solution available, right?

You run on XP or Vista? Did you install scripts, core patches, ... ? We really cannot guess what your problem is by just looking at an unclear post.

It's probably Vista. I'd suggest reinstalling as per this guide.

U need to run game.exe, game2.exe and wwconfig.exe in admin mode. For more solutions, check the FAQ sticky.

Sigh, Vista does not crash Renegade if it's not run in admin mode. Use the launcher app I wrote (get it from this topic) to get it to run,
