I ran disk cleanup and shit to delete all the junk files, Then it crashes and gives me the same error
message all programs do when they crash. But then I notice,
theres a fucking smiley face in the damn error message, I never seen that before....Its kinda like
rubbing in the fact the program crashed lol.

It's Microsoft's way of laughing at you because you bought Windows Vista(or got a computer with
it)

PS. Aren't I 1337?

that's not disk cleanup that stopped working that's "Removes temporary files. Frees disk space
and helps protect privacy! :-)" that has stopped working.

Not even Vista's desciption of Disk Cleanup says that.

In other words, if that's the program that comes up when you run disk cleanup you could have
spyware or a virus infecting your machine.

It looks like it could be this. Doesn't look too bad unless nobody actually installed it willingly, or it's something made to look like that but will actually eat all your drives.

I very much doubt MS would put in a smiley face, I would check your computer over thoroughly. If it comes out clan have yourself a laugh.

How did you know it was crawling with those if it didn't report that it was.

it didn't report that it was.
there were a few strange things and some defects, when I instaled kasperky antivirus it
automaticly found 5-6 trojans on disk C: (wihotut scaning)

lol Snipe's got a virus that imitates certain OS features...and also laughs at you.

Get all your data out and reinstall Windows; be sure to delete the older partitions during
installation. Also be more cautious while surfing and downloading.

As far as AV goes, get Symantec Endpoint...perfect.

If I were you I wouldn't reinstall windows I just went through hell doing that, also there's no way to
be sure it's in the windows folder.

That's like saying someone read a book without ever opening it.
