Hi!

Can anyone (only if you have time) make a map with a basketball hoop to it? Maybe 2 basketball hoops?

I want to play Renebasketball with my grenade launcher. Maybe make Grenades big like basketballs too but the hoops are more important.

Orca234 wrote on Mon, 01 December 2008 14:48Lol thats an idea i haven't thought about but i can't do it because ive never made a Ren map before.

lol...well it can be any map...just some hoops needed lol.

Then we can have teams with grenade laucnhers and play some renebasketball.

I got this idea yeasterday when I was just messing around with a grenadier behind ref on field.

Rp2 was considering doing this. Dunno what happened to it, though. Would still be pretty cool.

Ren's physics are way too shitty to have a decent basketball mini-game in it. That's what happened.

I am willing to buy this basketball hoop 3D model for this request:  
[http://www.the3dstudio.com/product\\_details.aspx?id\\_product=50821](http://www.the3dstudio.com/product_details.aspx?id_product=50821)

I thought this would be a nice place on Complex to have 2 basketball hoops:

I would like it on other maps too but don't want to ask too much cuz I know it takes your time!

EDIT: Thank you Gozy for clearing spam!

Yay for MSPaint skills

I dunno, if this was made I would probably suck at it

Well, I want it for myself!

EDIT: I just reread my post and was horrified to find it sounded selfish. OF COURSE NOT!  
Everyone can have the map...what I meant what I really need this type of map with hoop to have

fun in!

So, if you're just requesting someone take a map and stick those hoops in it... that wouldn't be hard to do, I could do it myself if I had the files (I wouldn't know where to get the gmax file for Complex, though).

I made this board specialy for your basketbal action. I think I would be nice to see something like it

If I where you I wouldn't buy that basketball board.  
15 bucks is a bit too much if you ask me

Although my basketball board is stil a bit crappier.

If you want to use it just credit me thats all

I can make any changes to it. So just call.  
Download is at the bottom:

Correct me if I'm wrong. But doesn't one of the Mission Maps have a "gym" on it? lol

The prison level, if I recall correctly. ;x

Ren's physics are way too shitty to have a decent basketball mini-game in it. That's what happened.

Dear god Canadacdn, for the 100th time there is a difference between the collision system and physics.

This idea would work fine on a flat surface, although projectiles to lack friction and air resistance options.

Wow...very excellent work and thank you very much, Reaver! I greatly appreciate your help.  
Thank you!

It looks great...as long as it has the hoop...and I agree the \$15 is a bit much but I was desperate.

This request has me fired up...I think it is about time I started modding maps starting with inserting objects into them. I will use your basketball hoop/board and will credit you.

Thank you very much once again!

I can't wait to come back home today evening...and read those renhelp tutorials and get started...!  
Hoply I figure it out...!

Thanks once again!

Allright thanks a lot, m8!

I am getting all the programs downloaded...
