Do those fancy HUDs with the map radars come in 1440x900?

I have yet to find one...

No, but it's quite easy to customize them for your own resolution. Just edit HUD.ini and change the location of the parts of your HUD until they fit the screen correctly.

And if the HUD is made correctly (with 3.4.4!) you don't even need to change hud.ini but no one reads bhs.txt and that's why you don't find any screen-resolution-independent HUDs.
