I've seen scrin's scrolling radar hud that shows where you are on the map. But I cant seem to find the dds or images for the original maps like islands and under. Do you know where I can find them, or how I can make the image?

You could make the image by opening the map in W3dviewer and take a screenshot of it from top view

Maybe you can get them with the huds on RenHelp?

If not, try what Di3 said

you can ask the creators (proably via PM) of the huds ur talking about if they would release the dds files.

if you wish to release your hud, you need permission to use other people's files.

Woops forgot about this thread....

Ok thanks much.

It might be easier to take the Screenshot in Level edit because it is a lot easier to control the camera there. Also if you press T you get a perfect top-down view on the map.

Top down view? I tried that the 'T' key doesn't work. and if I go that high in the air everything is foggy.
