Does anyone got a better download to the beta 2 full installer for a patch beyond?

one on game maps is broken
the one on its own site takes u here
http://www.gamershell.com/download_22515.shtml
which has no us servers, the ausi one is less then 4 kp per sec and the eruption hs 360 bytes per sec

does anyone got a good link

EDIT:Nvm I found it here is a ss the one circled in yellow is the broken link the one circled in red is the one that does work, something to fix
