I installed reborn mod to a second hard drive that's plug in into my pc and the game works but server listings wont show up, idk if its the secondary hard drive or something please help?

Note:My second hdd has a program files folder I made but it is a NFTS hdd does not have any os installed just blank with folders related to my pc inc program files,program data etc etc

Do you have Renegade installed with a valid serial? If not, you'll have to use direct connect.
