
Subject: [skin]C&C Islands Tunnels + GenBlacky's Islands

Posted by [Di3HardNL](#) on Fri, 12 Dec 2008 18:27:14 GMT

[View Forum Message](#) <> [Reply to Message](#)

This is the first version and might contain some bugs. But since I don't have much time right now I will update this soon. +/- 1 month.

But I am still happy about the result

Video link to youtube ->

<http://www.youtube.com/watch?v=V-Wh5P-UFqU>

And here is the FIXED download link. Should work for everyone now.

<http://files.filefront.com/Di3+Islands+Fixedrar/;12920636;/fileinfo.html>

- - Use GenBlacky's Egypt Islands WITH my tunnels - -

Download this ->

<http://files.filefront.com/Di3+Tunnels+Egypt+Genblayrar/;12901962;/fileinfo.html>

ENJOY.

Just a note ** If you want to use the original Islands tunnels again, simply delete all TGA/W3D

Files that start with ISL_

Now you still have C&C_Islands and C&C_Islands2 in your data. Delete C&C_Islands and rename C&C_Islands2 to C&C_Islands.

Hey, I started new project on my own, I am changing the tunnels in C&C Islands. I think it would be fun to keep showing what i have made so far, and maybe people could give suggestions or put up some cool idea's

So far I have added all textures to the models. I am going to lightmap these tunnels also for cooler effects.

Here are some screenshots. I rendered them in 3ds Max so you can see clearly what i have done (in-game screenshots comes later).

Of course when its done I will release it, and it will be possible to play online with, whatever I add to it

Tunnels

Nod Entrance

GDI Entrance

Yes, very nice indeed, I'm assuming you have the file in renex, and if thats the case I would like to make a suggestion...

You can probably guess why...

make a pit down there.. not necesarely tiberium and add the wind sound so it shows it's a deep pit
(and make the logos look like they're inscribed in cement cuz i don't like them that way, sry)

cement cuz i don't like them that way, sry)

Thanks for the ideas!, but what exactly do you mean with a 'pit' can you search a image of one on
google or something and show it to me Or is it just the same as what i did in refinery interior?

And with inscribed logo's you mean they are raising out of the ground?

Posted by [Di3HardNL](#) on Fri, 19 Dec 2008 19:32:04 GMT
[View Forum Message](#) <> [Reply to Message](#)

Here are a couple of screenshots. I like playing with this online =)

Whats still left to do

- Add lamps to the ceiling

- Fix up the gyser (you can see a little hill in one of my screenshots, thats going to be the gyser)
- Add some fishes in the space between the water.
- Changing a couple of textures and lighting.

I don't know yet what else i should add, and I am looking for good looking tiles/floor texture to match up with this Islands.

Posted by [Di3HardNL](#) on Tue, 23 Dec 2008 11:28:38 GMT
[View Forum Message](#) <> [Reply to Message](#)

I got a good idea yesterday to add to the tunnels.

I am going to add my own modeled/textured titanic ship (as a wreck)

Its very basic, because I don't want this to be a high poly since its just something to look at

Here is what it looks like right now

Subject: Re: C&C Islands Islands Progress
Posted by [Altzan](#) on Tue, 23 Dec 2008 17:23:19 GMT
[View Forum Message](#) <> [Reply to Message](#)

The Titanic could crash right next to the tunnels and the people fighting in the tunnels probably wouldn't even notice.

Titanic wreck would be a nice touch.

Posted by [Di3HardNL](#) on Mon, 29 Dec 2008 19:48:19 GMT

[View Forum Message](#) <> [Reply to Message](#)

I've been working on the titanic alot now, but it isn't finished yet. Got a little sick of it:P But will finish after i added more stuff to the tunnels. I'll show a screenshot of it later when its done.

I have been searching for fish models on www.turbosquid.com but they were all to high poly (all 5000+ which is way to much)

I just searched for a side view of a fish on google. So by making a Sphere and editing it with the differnt tools i could allign the fish on the picture. and the texture i use is the google image to

Now I made a lowpoly version of it which is 236 polygons, But it looks way better when i apply TurboSmooth, but then its 948 poly's

Here are 2 screenshots,

Lowpoly ->

Highpoly ->

If some terrain isn't showing up try download the C&C_Islands.THU file in my attachment in my

1ST Post of this topic.

EDIT.

Seems this file was already in the pack.. I have no idea what the problem could be..
It works fine for me so I don't get why it won't for somebody else

Well, it IS a large mod, editing the terrain itself, there would undoubtedly be some bugs...
I'll try deleting my .thu file and letting it generate a new one, see what that does.

[View Forum Message](#) <> [Reply to Message](#)

There could be some little bugs ofcourse, but on your screen there is no terrain at all

And I didnt add that much polygons
The original tunnels model size is 344 KB.
My tunnel model's size is 364 KB.

I did have to edit some presets in LE but they were automaticly saved in the .MIX I guess.
Because you don't need any objects.ddb.

But I'll try figure this out, because I feel bad that it doesn't work for you.

Is it ACTUALLY WORKING for ANYONE except me?

...

afaik as soon as you edit something inside the LE presets and save those changes (if you didn't TEMP (transparent + button) them but ADD'ed (+ button) or changed them) you will have a change in your OBJECTS.DDB that means you will have to supply that file too. By TEMP adding another file will be created. Don't know the name atm haven't got LE installed

Subject: Re: RELEASE - C&C Islands Tunnels

[View Forum Message](#) <> [Reply to Message](#)

I used TEMP for everything i added, also need to do this when you want it to work online.

Is it possible that something (preset) the map needs to show the terrain and that its path is in my LE folder?

Subject: Re: RELEASE - C&C Islands Tunnels
Posted by [Reaver11](#) on Tue, 06 Jan 2009 16:11:37 GMT
[View Forum Message](#) <> [Reply to Message](#)

Islands use three terrain presets.

1. C&C_Map_Islands 0116 - includes
2. C&C_Map_Islands 0116 - terrain
3. C&C_Map_Islands 0116 - tunnels

You shouldnt adjust the items in these presets I think this information is also stored in the lsd file of the map.

terrain\levels_multiplay\c&cmap_islands 0116\tunnels_lm.w3d
terrain\levels_multiplay\c&cmap_islands 0116\tunnels_lm.wlt

These are the current paths set for the preset. Instead of adjusting these save your tunnels as one of these files and put them in the mix. Just let it work as a skin replacement. Any skins light data will be supplied with the .w3d file and the .wlt file.

You can use any textures you want

Subject: Re: RELEASE - C&C Islands Tunnels
Posted by [Di3HardNL](#) on Tue, 06 Jan 2009 16:32:57 GMT

[View Forum Message](#) <> [Reply to Message](#)

I tried just editing the tunnels_lm before. But you can't rename or add any meshes if you want it to work without using LE.

Or do you mean to just save the w3d as that filename and then import it in LE?

Subject: Re: RELEASE - C&C Islands Tunnels

What you have to do is what all gun skimmers do.

They make a totally new gun lets take a m16. They create the gun rig it and afterwards they save it as f_gm_rifl etc

So create you terrain as you want and then save all the stuff as renegade does it for the tunnels as I posted above.

Then it should work.

[View Forum Message](#) <> [Reply to Message](#)

could you guys rescale your siggies, there a bit too big

Subject: Re: RELEASE - C&C Islands Tunnels
Posted by [Di3HardNL](#) on Tue, 06 Jan 2009 18:20:35 GMT
[View Forum Message](#) <> [Reply to Message](#)

Its only the tunnels, I could do the rest, but Genblacky already made a egyptian version of it which alot people already use.

Got any ideas for other maps?

I could also redo the tunnels in other maps (like volcano or field)

UPDATE FIX!!

Missing terrain in Islands is now fixed. I used 2 .MIX. 1 for my tunnels and the other for the other terrain.

When I saved as 1 .MIX the terrain wouldn't show up. But when you add the original model/texture files of C&C Islands you will see it works! It also worked for crisis

DL link updated with ALL needed files in first post.

YOU WIN DI3

It works for me now, and it's freaking sweet, looks awesome!

I noticed the fish actually swims OUT of the tank a little bit, nothing major but it made me laugh

Now I'll always go into the tunnels and not help my team at all, lol.

Good Job mate

[View Forum Message](#) <> [Reply to Message](#)

Seems like your Renegade can't find the lightmap files of the original renegade.

Tell me if its fixed when you put the files in which are in my link.

Unzip the .RAR, then not only copy the files WITHIN the map mp_islands_sun+.
BUT COPY the whole mp_islands_sun+ map to your data. I hope you understand what to do

<http://files.filefront.com/mp+islands+sunrar/;12900942;/fileinfo.html>

And I'll fix it so that you can use genblacky's islands to. Downloadlink of it will be up anytime soon.

I've managed to make my tunnels and GenBlacky's Islands work together.
It has been tested by some people and it should work for you all.
Downloadlink added in my very very first post.

Enjoy

I need to know how i can mix the TGA/DDS/W3d files in the .mix

then there will simply be 1 file, which is much easier for all of us. Blacky do you know how to do it?

When you have your .lvl file open in Leveleditor go to:
Edit => Include Files

A window opens.
-Select "Level Specific"
-search file in "File Spec:"
-press "Add"-Button

Now this file will be included when you pack the .mix archive with LE afterwards.

Thanks Deathlink
Only I have 1 question, Since I edit some parts of original maps I am including the original files for the map, but there are also lightmap files,
They supposed to be inside a folder then I want to add the folder to the .MIX. How would I do that?

Thanks
