are you asking for the GDI PT icons in green color, but a still yellow GDI hawk? I can get you a
plain version of it, without characters/vehicles on it. It would take time to add veh and characters.

Lol, I could use the hue to greenify it but it would do the same for the vehicle pics and the logo.

Yeah, I noticed you're fairly good at PT icons. I tried it myself but there were some annoying white
dots around the outline of the figure.

in gimp, i can just click once (using hand draw cut/copy/paste), ad it will drwa a line from the other point, so i don't have to drag it around like paint. I also tend to zoom in to about ~500% and cut off VERRY little parts of the pic to prevent the tiny dots.

sry for the delay, but i have to do ~30 skins, and each take about 5 min each for good quality. I'm currently working on it, and will upload when done. have about 5 done right now, but b/c of the time of the year, i have to do alot and won't be able to finish in one run. Aprox upload date:

1-5-09 (if not earlier)

If i haven't finished it by then, i will upload all i got.

=samous

BTW: when this is finished, it would be a good thing to upload to Games.net or whatever it called.
