Does the bounding box contain the transitions for a vehicle so when you look at it you see the health and name from strings.tdb?

I made this vehicle wreckage and it has a bounding box and a world box but you don't see the name or the health using the original mrl transitions just to test.

Neither of which are really used to generate the targeting box. Make sure the model is fully collidable and the box might just show up (Also, make sure the preset has "Targetable" checked \*on\*)

Also, tiles cannot be targeted.
