I've had to click on "forgot password" 6 times before it sent anything that works, and now I can't change my password to anything, nor can I change any of my settings, signature etc because the password I've been provided with that the forum has given me isn't valid, nor is the password that I changed TEN SECONDS PREVIOUSLY!

What the hell is going on I'm close to slinging my laptop in disgust at this

yeah, he probably means for this forum.

maybe you should give an extended information about your problem so mods can help you about it.
