I have no idea where else to put it, so...

How do you start a clan? No-one online can tell me. And once you've done that, how do you invite other players?

I tried to check the clans page, but that doesn't load.  
Or any of the pages on the sidebar besides Buddies.

Lots of things haven't worked since Strike-Team/XWIS took over. The closest thing is clanwars.cc.
