Hello, i need help with a weapon spawn i made. The thing is whenever i try to use it in the server, it crashes the clients! Here's What I Did: Made an advanced weapon spawn of a 500 sniper. Which spawns in multiple places. I deleted the .ldd and .lsd files into the Mix Editor and saved. Then I Uploaded. I tried with the Objects file in the presets folder as well.

If you followed the tutorial it shouldn't crash clients. You can see in that tutorial at the end I join the game to prove it works.
