I am in the mission where you are supposed to sabotage Kane's temple, the first mission is to open the gate by getting a security card and open it by going to it from the rear and activating the card in the control panel. Now how the hell do you get there? Is there a way to that place from the Tiberium Refinery? P.S there's one gate before that but it doesn't open as well...

there is a passage way near the refinery. when you get behind the gate there is a small switch, use the action key to press it; the gate goes down

Thank you, although I noticed that passage before you helped me out (got into the refinery and went all the way through it til I found out about that passage... Now what puzzles me is that spaceship... I got in that spaceship and killed anyone in it... now what? What am I supposed to do in there? P.S Does anyone know how bonus objectives help?

Maybe its some lead to an expansion and kane flys to the moon and finds mass sources of tiberium, i think it would be stupid for that to happen, like on yuri's revenge where u go to the moon, i did'nt like that. But u never know

To kill Petrova, first save up some ion cannon shots. Use the volt auto rifle (that's what it's for) and don't let her move. Keep blasting her with energy weapon fire. If you run out of energy weapons, use a flamethrower. Hope this helps.

So the only thing that you can do in there is just to kill those mutants and get a Auto volt rifle?Then what is the second bonus objective (first one is to destroy the Obelisk)?P.S Can anyone tell me how to turn into a mutant in Multiplayer and how to change Raveshaw's skin to be like that monster?

And you get the tertiary objective just for walking through the door. If you're low on health - probably not worth it though.

I don't know exactly what mission it is but if I am correct I think you are supposed to have a mammoth (the one you were supposed to protect in the start) get in the mammoth and destroy the Obelisk from afar. About the gate, I think there is a switch there you need to press on (action key E) then it'll open
