Hello, i tried to edit the Cameras.INI, i edited the original one and putted it into my Data folder.

But i dont see any changes in Multiplayer Practice Mode, then i tried to load the serverlist and the list was gone, so thats the proof that the Cameras.INI is in the right folder.

I really need to get the Cameras.INI work for my Mod, do anyone have Ideas how to fix that?

Cameras.ini is very touchy, just screw with a lot of settings and see if you can get anything to change, some of the vehicles use other vehicle cameras and not the ones under their own name as well.
