Its done downloadlink below my screenshot

By the way I forgot how to add those muzzles (when you shoot you see some fire or something). Also i need to know how to add emitter like smoke, but it must only appear when a bullet is shot

Anyone knows the w3d settings for those?

(thanks to scrin for making my special renegade logo)

Yo put the files within this .RAR pack in your data to see the muzzleflash (fire effect) from when you shoot.

Its nice

MUST HAVE OTHER PACK WHICH I SENDE BEFORE IN YOUR DATA TO.

Remington 870, preferably in the black and silver style.

I'd 'bone' that 'model'.
