OK, EVERYONE! Do NOT do this! This subtracts from the team-maximum of 30 mines, and the base defenses will be screwed, just inviting some stealth dude to run in and blow a building.

how many times is this tactic going to be invented?? lol...look, your mines are needed for base defense so please don't use them this way. besides, if someone else is out there planting mines, you might discover all yours are gone before you get to your target. so unless you're on base defense or putting them on enemy mt's, just don't use them at all.

Yea, besides, everyone know s you don't stick them on your team's vehicles. You stick them on your teammates and freak them out.
