? what do you mean by that ?

also, why don't you just look for skins on Google?

=Samous

-btw:google is (R), but SOOO many companies and websites use the name without the (R). Is that good (b/c companie is so well known the word "google" is pratically now something that deserves to be in a dictionary with the def: to search something on the internet, preferably on google.com) or bad (no (r) rights are being followed)?

EDIT:check spoiler in sig
