I saw in MOD forum a skin for this, I thought lets give the crate some reflection effect and change the shape a little. So here is the model.

- Replaces the little yellow crate
- Replaces the big grey crate

You can't see the reflection effect to well on this screenshot, but you'll get the idea

Enjoy

Sure trumps mine. (Which I made in 3 minutes)
Great Job!

Looks nice. Is it as big in-game as in the picture, though? When a server has the small yellow crates and you have the big ones, wouldn't you get the crate faster than ment to be if you run close to it?

This cube is just the size of the yellow box
