Ok so this is Renegade on my new monitor...At 1920x1200 blah blah, it's insane!!

Tinypic resized it for some reason...

Here's the full screenshot, uploaded to mediafire

That's awesome...looks cool! I am jealous of you but my upgrade will wait for a couple months.

I am happy you are using the Havoc skin I made...! Looks good!

I really like that skin, it makes the game a bit more 'complete'. Since havoc is part of the Dead-6 I think he should dress like that.

Anyways, soon I will upgrade to an ATI HD4870 1GB and I'm gonna return my motherboard since it won't work with my RAM.

Yeah mines 1900x1200 as well. Kicks ass

The only shitty thing is not many custom huds are compatible with a res that size (the custom huds that i seen anyway)

I'm still getting used to the resolution, but I think I'll manage soon enough. Also I found that Deathlink's HUD works pretty well with this resolution.

Toggle Spoiler

Technically, even 1280x1024 is HD, as anything larger than 1280x720 qualifies. 1920x1080 is full HD, and larger is more than full HD.
