Hello, my first post here... if a similar thread exist, im sorry!

I played Renegade after Release for some years (and hell, that was fun), but then it was unplayable, the ping went on every server over 200 (for me it was impossible to play).

How is it today? Can i play with a ping which is lower than 100? Are there enough players? I never installed any modification, but i think Renegade still lives because of them. Would somebody tell me something about Renegade - today?

Thank you and greetings from Germany!

Hello there and welcome.

Renegade is still alive, though the player counts have gone down a bit. It's surely possible for you to find a decent server, though .

As you're European, your best bet is to search for an European based server to get a decent ping. At the risk of sounding like making publicity, you could drop by our KOSs2-BI server which is located in Amsterdam, Holland. Ping there is between 60 and 130 for me (I'm from Belgium).

I'm sure you'll find back the fun in this great game quickly . Be sure to check the install guide sticky in the "renegade client" subforum if you want to add some of the community patches with various bug fixes.

Cya soon online .

Renegade still has a pretty solid playerbase considering how old of a game it is. Definitely worth playing still, if you can find a good server.

If you have lag problems, though, it might be your computer?

First of all, thank you for the friendly comments. It doesn't happen often (today) that new people were treated that way

In the past the lags were not only my problem, everyone I knew had pings like me. And after that I thought Renegade were given up.

But its good to hear that its possible to play one of the best games I knew.

So I have to find at first my Renegade, hadn't touched it for many years

Hi, welcome back to Renegade. Unfortunately there aren't any active fanmap servers (apart from UNrules) so most of the servers you see will only have the Westwood maps and C&C Glacier Flying in their map rotations.

Welcome back!

The game is still very playable indeed. Frag you ingame!
