The KOSs2 community (who's most prominent member is your very own local servant ^^) opened a small contest to create a KOSs2 skin for the vehicles in Renegade.

i know the prizes won't be of much significance to most of you, but maybe some of you have some time and are in it "for the challenge" and to make me a happy lappy!

You can find more info about it here. I'm convinced some of you artists can put your talent to good use for this .

Thanks!

Unrelated: people should be banned for playing at that resolution.

Laptop. Then again, if I link my laptop to my 32" TV, I could get a big resolution and still have an advantage thanks to wide heads on a 16/9 flatscreen.
