I would like to request the source code to the version of bhs.dll that ships with SSGM2.02. I am happy to sign a non-disclosure for this if needed, and will pay for the postage costs if any are incurred.

I need the source code because I would like to remove the code that's in bhs.dll that creates BHSrenlog, and because it probably hooks renlog itself too, which I wouldn't mind having access to.

Sorry, we can't do this because we lost all sources older than TT. (Things are nicely under version control now though.) Perhaps jonwil has a copy somewhere but it's unlikely.

LOST!??

Sorry, did someone crack into every BHS/BI and other's PCs?

No, noone has had most older versions of bhs.dll except for jonwil and there was no version control system. Afaik jonwil does not have the older versions anymore either.

Thanks for the info, it's a shame it doesn't exist anymore.

SSGM 2.02 is based off of scripts 3.1.4 which is really old now...
